Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable. Also here in PA we are in a midst of a Tax increase across the board, ie; water, property, road and now the working Tax jumped from \$10 to \$56 and THATS UNFAIR TO PART TIME PEOPLE.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In fact I don't make any long distance calls at all, because of the cost. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience not to mention kepping in contact with my family. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Charles Gill
